

business audit & attest

Accounting can be so much more than simply reporting what happened in the past. Let us provide you with a clear financial picture of your organization. The business audit services team specializes in interpreting financial statements and providing management reports in ways that help businesses plan for the future.

When clients work with HLB Tautges Redpath they receive more than the required audit, review or compilation. We want clients to feel the value of our in-depth approach by utilizing the valuable information we deliver to make informed business decisions.

Accurate and concise financial statements provide a clear financial picture of your organization – a powerful tool your management team can use to make better decisions.

Specialized Services:

- Audited Financial Statements. Provides the highest level of attestation a CPA firm offers. These financial statements require reviews and tests of your transactions and procedures.
- Reviewed Financial Statements. Includes our analytical review of your financial statements and discussions with management.
- Compiled Financial Statements. We work with your accounting records and staff to compile the financial statements in accordance with current reporting practices.
- Retirement/Employee Benefit Plan Audits. We structure benefit plan audits as its own service area, separate from our other audit areas. This approach reflects our view that a benefit plan audit is not an after thought or by-product of a larger engagement, it is an important service area at our firm. We are a good fit for entities that expect the assurance of a high quality audit.
